

HASINDU NAGOLLA

Software Engineering Undergraduate

Sri Lankan | +94 76 285 3913 | hasindulakshan.me@gmail.com | www.hasindunagolla.live
<https://www.linkedin.com/in/hasindu-nagolla> | <https://github.com/hasindu-nagolla>

Dedicated Software Engineering undergraduate at The Open University of Sri Lanka with interests in Artificial Intelligence, Machine Learning, Python, and full-stack development using the MERN stack. Skilled in developing scalable web applications, AI-powered solutions, and backend systems while continuously enhancing technical and problem-solving skills.

TECHNICAL SKILLS

Python • JavaScript • React.js • Node.js • Express.js • Tailwind CSS • MongoDB • REST APIs • MySQL
• Java • TensorFlow • NumPy • Git • GitHub • Linux • Postman

EDUCATION

Bachelor of Software Engineering (Hons) – Undergraduate

The Open University of Sri Lanka (Sep 2022 – Present)

Research Focus: Developing a Deep Learning Model for Online Scam Detection in Sinhala

PROJECTS

MindBou - Article Sharing Platform (Ongoing)

TypeScript | React.js | Node.js | Express.js | Tailwind CSS | MongoDB

- Developing a full-stack article-sharing platform with AI-powered features using Python, enabling users to publish, manage, and explore content efficiently.

Music Streaming Bot

Python

- Developed and deployed a Telegram music streaming bot with high-quality audio playback and command handling using Python, yt-dlp, FFmpeg, and VPS hosting.

MediMate - Online Appointment Booking System

EJS | Node.js | Express.js | Bootstrap CSS | MongoDB

- Collaborated in a team to develop a healthcare appointment booking system that streamlines patient and doctor interactions and appointment management.

Spam Detection Model

Python | TensorFlow | Keras | Pandas | Scikit-learn

- Experimented with an NLP-based SMS spam detection model for binary text classification using data preprocessing, text vectorization, and deep learning techniques to identify and filter spam and scam messages.

CERTIFICATIONS

Neural Networks and Deep Learning

Coursera

- Learned deep learning fundamentals, neural networks, CNNs, RNNs, supervised learning, and model optimization using Python.

JavaScript: From First Steps

Frontend Masters

- Gained knowledge in JavaScript fundamentals, ES6+, asynchronous programming, DOM manipulation, and modern web development concepts.

Python and Flask Framework

Udemy

- Studied Python programming, Flask framework development, APIs, database integration, and backend web application concepts.

NumPy Data Analysis

Udemy

- Learned NumPy, data preprocessing, statistical analysis, numerical computing, and foundational data analysis techniques for AI and ML.

Python & Web Development

University of Moratuwa (CODL)

- Completed beginner-level training in Python, HTML, CSS, responsive web design, and basic front-end development.
